

OUR SCORE CARD 2023

20 Years of Delivering Health Outcomes in Kenya and Beyond

OVER 1 million

clients tested for HIV using a mix of modalities. Of these, **23,192** tested positive for HIV and linked to care and treatment.

281,665

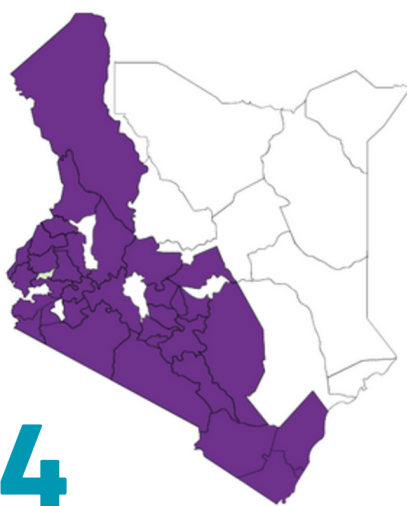

clients active on life-saving antiretroviral therapy (ART).

198,755

Vulnerable, marginalised and hard-to-reach populations reached with comprehensive HIV prevention services.

27,004

individuals were newly initiated on **PrEP (pre-exposure prophylaxis)** to prevent HIV infection

34

of 47 counties supported in Kenya

219,865

pregnant and breastfeeding tested at 1st ANC*, with a 100% uptake of life-saving antiretroviral therapy (ART) for those who tested positive.

77,198

women across supported counties screened for **cervical cancer**. Of these, 1,329 (1.7%) screened positive, and 1,167 (88%) are on cervical cancer treatment.

204,250

screened for **Tuberculosis (TB)**, a 30% increase from previous year. Of those screened, 3,450 (1.7%) tested positive and were initiated on treatment.

6,358

people who inject drugs (PWIDs) were reached with HIV and TB prevention and treatment interventions.

84,514

key and vulnerable populations across LVCT Health-supported facilities and drop-in centers (DICES) received **gender-based violence (GBV) interventions**. Of those, **72,521** individuals experienced physical or emotional violence, while **11,993** experienced sexual violence.

4.8+ million

adolescents and young people were reached with comprehensive HIV, sexual and reproductive health, and gender-based violence (GBV) information through the one2one™ digital platform, the Oky App period tracker, and mainstream media.

29,012

adolescent girls and young women were reached through DREAMS HIV prevention services in Kiambu and Homa Bay counties in Kenya. Of these, **26,812** were integrated into transformative economic empowerment interventions for improved income and self-reliance, while 4,843 benefitted from the education subsidy program.

*DREAMS: Determined, Resilient, Empowered, AIDS-free, Mentored and Safe is a PEPFAR-funded initiative that seeks to empower vulnerable adolescent girls and young women between the ages of 10 and 24 with the knowledge and skills to make healthy choices and remain HIV-free

Generating Evidence for Health through Research

LVCT Health prides itself on being a leader in implementing research that connects communities with the health system. In 2023, we conducted operations and implementation research, utilizing the evidence generated for advocacy and technical support in national policy reforms, program development, and service delivery. We also presented abstracts at national and international conferences

11

Studies/ Evaluations undertaken, completed (and ongoing)

12

Research publications

13

Abstracts presented at national and international conferences

Strengthening Local Capacity for Health

400+

community health promoters trained on eCHIS to improve community health services.

87

companies supported through LVCT Health's wellness services.

\$16 million

subgranted to other organisations and county governments for delivery of programs and interventions

Towards Sustainability

Registered in 2019 as a company limited by guarantee, WEMA by LVCT Group generates funds for the sustainability of LVCT Health.

3,500+

employees were supported through WEMA Kazini.

517

individuals were trained on HIV, gender-based violence (GBV), and mental health through our Training Institute.

6,218

clients were reached with mental health services.
